ABOUT ME

I am London based Graphic Design Graduate with a Art & Design background who enjoys Sci Fi and Martial Art films plus boxing. In my spare time I enjoy designing for various clients using old school methods, then modifying them with relative programmes such as Photo-shop, Illustrator, In-design, using my Mac. I am passionate about designing across the board, and often develop personal projects working on ideas for print and publications. I believe design to be a visual language similar to hieroglyphs that should be easily accessible by the wider public rather than addressing a limited target group if possible.

Another passion of mine is music in which I was part of a DJ group, covering a variety of roles (MC during live radio night clubs and on stage; promoter; producer; designer). Being part of such a collective at a young age stands as a good example of my creative abilities across different disciplines, my natural ease at working in a team, and certainly proved an invaluable experience for cultivating my networking skills.
