

London based graphic design graduate with an art & design background who enjoys Sci Fi and Martial Art films plus boxing. I enjoy designing for various clients from corporate to fashion and more, using new & old school methods then modifying them with relative programs such as Photo-shop, Illustrator, In-design, plus more.

Highly versatile and passionate about designing across the board, and frequently develop personal projects working on ideas for print and digital. Design is a visual language similar to hieroglyphs that should be easily accessible by the wider public rather than addressing a limited target group if possible, dependent on context.

- Digital and print + large format prtng

## INTERESTS

My additional passion is music previously being part of a DJ group, covering a variety of roles (MC during live radio night clubs and on stage; promoter; producer; designer). Being part of such a collective at a young age stands as a good example of my creative abilities across different disciplines, my natural ease at working in a team, and certainly proved an invaluable experience for cultivating my networking skills.
